

Code:

<https://colab.research.google.com/drive/1ug3bsIU6UyHDs3jReFKrkUL4dxggfSp5#scrollTo=DAfrTcHduLeY>

I will experiment over the break to make up for not having very much time this week.

I also looked more into the QWEN model. Repository: <https://github.com/QwenLM/Qwen>.

I looked more into additional datasets we could use since we only have one.

1. <https://developers.google.com/earth-engine/datasets/catalog/modis>
2. <https://fireecology.springeropen.com/articles/10.1186/s42408-024-00335-2/tables/2>

I asked Kinjal to take a look and help preprocess it and prepare the dataset.
